

AGGRESSER SPONSONS

Aggressor sponsons are a must for awesome handling and top speed (up to 1.5 mph gain). They are lightweight, and are streamline in design for the ultimate in handling and top speed (like riding on rails). Aggressers have less drag than other sponsons with a G-Force turning ability. They are fully adjustable with an optional shim kit (Sea-Doo models only) for dialing in the hull for maximum performance. U.V. Protected, and come with a lifetime warranty from breaking.
