

Bomber™ FLOATING EYEWEAR

Designed & Patented by World Champion Jet Ski Racer, Tommy "the Bomber" Bonacci and created for active sports people, in or out of the water.

Bomber Sunglasses are Patented with a foam rubber lining that: floats (for water recreation), provides extra comfort (for longer wear), and provides extra snug fit which helps prevent glasses from blowing off when turning your head on a boat or motorcycle... a feature that could help avoid accidents.

Safety Features.... ANSI Z87.1 1989 Osha Approved safety feature required for many industry jobs. The "A-Bomb" and "ZF-Bomb" models exceed the standards to get this special mark which is stamped on the right side of the frame. The frame and lens must be molded together to avoid lenses from falling out. Bomber frames & lenses are made of polycarbonate, which is an element of bullet proof glass, to enhance your eye protection and peace of mind.
